

VORTEX

THE PROCESS USED TO RESTORE THE NATURAL HEALTH OF WATER IS BY PROPRIETARY

“DOUBLE SPIRAL MOVEMENT”.

In the units, the water is processed through a double spiraling flow form creating a very powerful vortex energy field. The vortex shape is found everywhere in nature from hurricanes, maelstroms, tornadoes, seashells, plants, antelope horns, shell fish, snails, the human DNA... It is always the natural path of least resistance that free-flowing water takes in order to keep itself healthy and energized. This is in sharp contrast to tap water which travels miles in straight pipes and 90 degree turns resulting in lifeless and low frequency water.

By using the power of vortex energy fields via "flow form dynamics" and energy transfer, the Vortex Water Revitalizer transforms the water and restores its innate powers: the VWR wipes out the old frequencies and memories from the contaminated water and revitalizes it into "newborn" water. One of these powers is the ability to self clean. Another positive result of the VWR is a significant increase in the amount of dissolved oxygen (22-25%) in the water.

A scientific explanation of how the Vortex Energized Water System works is through interpretation of an elaboration by Viktor Schauberger in his book, the Water Wizard.

It is done in a layman version to help you to better understand the process that water goes through to revitalize it back to a "living water" state:

"This is an explanation of the dynamics of a double spiraling flow pipe and how the vortical (vortex or actually vortices; many vortices, not just one, which spiral down a central axis within the pipe) movement of water through the pipe separates the oxygen and polluting particles from the water at the periphery, then because of the concentration of oxygen and pathogenic bacteria (bad anaerobic bacteria) through the causation of centrifugal force(vortex action), the pathogenic bacteria are eliminated (oxygen saturation of the anaerobic bacteria kills them). The surface tension of the water becomes softened (hydrophilic; self-cleaning properties) through the separation of the oxygen from the carbon particles which results in a mechanical acceleration of the water which gives rise to a build-up of energy that purifies and sterilizes the water (that has eluded conventional science's understanding as of today). This is the action of the initial spiraling affect.

The ensuing spiral action (double spiral flow form) as the cooling particles are drawn toward the center once again: the temperature of the water at the inner core of the vortex is cooler, while the water at the periphery is warmer. Within the cooler inner core, carbon gases are centralized whereas the oxygen, located at the warmer periphery, spirals

inward due to the cooler center and there begins an energy producing reaction between the oxygen and carbon particles from the periphery inwards, not affecting the outer walls of the pipe. This energy sterilizes and purifies the water, while the particles that are not drawn into the center are pressed against the outer wall (due to the mechanical pressure from the spiraling vortex action) and there these particles combine with and seal the pores of the outer walls (strengthening and solidifying them) which allows the water to accelerate and build up additional energies." This circulation of energy produces a continuous electro-dynamic process thereby purifying the water and also enriching it with life giving energy.

Benefits of the Vortex Water Revitalizer within your body, your pets, home, garden, food and place of business:

- Increases the dissolved oxygen in the water.
- Improves the body's ability to obtain nourishment and eliminate/excrete the toxins and wastes from your body.
- Eliminates and prevents further slime build-up caused by bacteria.
- Reverses polarity (negative/positive) of the toxic substances, such as heavy metals, pesticides and nitrates, thereby eliminating their harmful effect on your body.
- Provides your family, guests and animals with improved health and energy, and assists your plants in growth and in "bearing fruit".
- Vortex energized water becomes softer so you avoid dry and irritated skin after showering, even with chlorinated water. It's also good for your scalp and hair.
- Minimizes or eliminates calcium and rust deposits and corrosion on plumbing pipes, fixtures and shower areas (natural stones, tile, etc.) making it easier to maintain without
- the use of harsh chemical cleaners in most cases.
- Improved quality in the taste of the water.
- Removes and releases the taste and smell of chlorine due to the **vortex action** and the **implosion process**.
- Food cooked with vortex water tastes better and lasts longer
- Works well with any filtration system.
- Absence of sludge in your drain system due to the vortex energized water. The higher frequencies, energy, oxygen, absence of anaerobic bacteria, and the molecular structure
- of the vortex energized water raises the energy (frequency) of lower frequency water and helps to revitalize it, thereby:
- Transfers the positive vibration/frequency of vortex energized water into your septic tanks or out to the surface and depths of the ocean through your sewer system, aiding in the
- revitalizing of our most precious gift (water) from Mother Nature.
- Vortex energized water does not lose its effect and may last for many months which helps to remedy traveling and being able to have vortex water available to you.
